Product Line Card

VALVES & AUTOMATION

Flowserve is a global industrial equipment leader offering a comprehensive portfolio of high-performance valves and automation solutions designed to optimize fluid control in diverse industries worldwide. See reverse for additional information and product offerings.

Apollo Valves has earned a reputation for developing products to meet emerging market demands. Offerings include; ball valves, butterfly valves, backflow prevention valves, safety relief valves, water gauges, pipeline strainers, vacuum breakers and valve actuators.

Asahi/America is a leading provider of thermoplastic fluid handling products, specializing in high-quality valves, piping systems and instrumentation for a wide range of industrial applications.

Cameron offers a number of cast, forged & stainless steel NEWCO gate, globe and check valves, exceeding all industry performance requirements and are ideal for the downstream market. Cameron's NEWCO valves are used in the power, oil and petrochemical industry for high-pressure applications.

Chemline Plastics is a prominent manufacturer and supplier of innovative thermoplastic solutions, delivering high-performance industrial valves, fittings and piping systems to meet the diverse needs of various industries.

Georg Fischer valves are available for a variety of applications in the commercial, industrial and residential markets. Valves are available in CPVC, PVC and polypropylene. Georg Fischer products include ball valves, diaphragm valves, butterfly valves, pressure control valves (PRV) and check valves.

OS&B Industrial is a division of OS&B and offers a range of stainless and carbon steel ball valves. Offerings include; hygienic and flanged ball valves as well as their line of butterfly, gate, globe & check valves. In addition to their own line of products, OS&B Industrial also distributes a number of complimentary products from other brands.

Sharpe Valves is a subsidiary of ASC Engineered Solutions and is a leading provider of precision-engineered valves. Known for their quality and reliability, they cater to diverse industries and applications worldwide. Offerings include ball, gate, globe, check, butterfly and control valves, available in various materials and automation.

SVF Flow Controls is a recognized leader in flow control technology, offering a full range of superior quality engineered valves, actuators and controls for unique applications including high pressure and high purity. Designed of exotic alloys, SVF serves various industries including chemical, petro-chemical, oil & gas and refining.

MEASUREMENT & INSTRUMENTATION

Medina Supply Inc. is a distinguished distributor, offering a comprehensive range of measurement and instrumentation products sourced from industry leaders. Medina Supply serves diverse industrial sectors by providing reliable solutions for accurate measurement and monitoring need. To ensure quality compliance, calibration and test certificates are available by request upon ordering.

PIPE, FITTINGS & FLANGES

Medina Supply Inc. offers a wide range of pipe sizes and grades for your industrial needs. All pipe products offered are 100% traceable and we are pleased to provide you with the appropriate documents. Various sizes of carbon steel, stainless steel, PVC and CPVC are stocked in our indoor pipe storage facility.

Additionally, our inventory includes a comprehensive selection of pipe nipples in various materials and sizes. Explore our offerings, which extend to ANSI flanges, assorted gaskets and an extensive range of pipe fittings in forged steel, black malleable iron, galvanized iron and stainless steel in class 150 and class 3000, as well as seamless weld fittings to meet diverse industrial requirements.

BELTS & BEARINGS

Medina Supply Inc. takes pride in presenting an extensive range of bearings, housings & inserts, sprockets & chain, o-rings & seals, providing essential components for your industrial needs. Our inventory also includes a diverse selection of industrial v-belts, pulleys and bushings from trusted brands, ensuring comprehensive support for your operations and equipment maintenance needs.

HOSE & HIGH PRESSURE FITTINGS

Medina Supply Inc. is pleased to offer a wide range of hose and hose fittings including camlocks in addition to high pressure fittings for tubing applications.

Worcester Controls

FLOATING Three-piece Ball

Designed to ASME B16.34 with various configurations available.

Sizes: DN 8 to 150; NPS 1/4" to 6"
Press: PN 100; Class: 600
Temp: -46°C to 230°C (-51°F to 446°F)

FLOATING Flanged Ball

Designed for high-cycle operation, pressure integrity and high temperature endurance.

Sizes: DN 15 to 250; NPS 1/2" to 10"
Press: PN 20 to 50; Class: 150 to 300
Temp: -46°C to 315°C (-51°F to 600°F)

PNEUMATIC - RACK & PINION F39 Actuator

High-cycle pneumatic power for on-off or throttling control of rotary valves and dampeners. Available in double-acting or spring-return configurations.

Torque: 7100 Nm (62,835 in-lb)
MAWP: 8.3 barg (120 psig)
Temp: -40°C to 150°C (-40°F to 302°F)

Atomac Valves

LINED AKH2

Two-piece lined Full Port Ball Valve offering high safety factors, stability, rigidity & eliminates potential leak path.

Sizes: DN 15 to 350; NPS 1/2" to 14"
Press: PN 16; Class: 150
Temp: -10°C to 200°C (14°F to 392°F)

For Stricter Pressure Requirements AKH2-300

Sizes: DN 25 to 150; NPS 1" to 6"
Press: PN 50; Class: 300

For Reduced Space AKH2A

Sizes: NPS 1" to 6"
Press: Class: 150

LINED Sight Glass Series

Provides clear visual inspections from both sides with integrated drip lip for flow indication. Available in standard, three-way and four-way models.

Sizes: DN 25 to 150; NPS 1" to 6"
Press: PN 16; Class 150
Temp: -10°C to 200°C (14°F to 392°F)

Automax Valve Automation Systems

PNEUMATIC - RACK & PINION Supernova

Rugged yet compact, the S Series actuator is the latest development praised for its reliability, versatility and safety.

Torque: 5005 Nm (44,292 in-lb)
MAWP: barg (120 psig)
Temp: -50°C to 150°C (-55°F to 302°F)

PNEUMATIC - SCOTCH YOKE RG

Ductile cast iron, heavy duty actuator series for chemical & general process industries, offering over 250 torque profiles.

Torque: 248 kNm (2.2M in-lb)
MAWP: 10.3 barg (150 psig)
Temp: -55°C to 150°C (-67°F to 300°F)

SWITCH BOXES Aviator II Ultraswitch

Up to C, 4.5, the integrated on-off controller meets corrosive, hazardous/non-hazardous location requirement needs.

No. of Switches: 0 to 4
Temp: -20°C to 80°C (-4°F to 80°F)

Durco Valves

LINED BTV

Reliable, leak-free service butterfly valve designed for corrosive chemical and process industry applications.

Sizes: DN 50 to 600; NPS 2" to 24"
Press: PN up to 16; Up to 150 psi
Temp: Up to 177°C (350°F)

NON-LUBRICATED G4 / G4BZ-HF

Reliable & versatile Sleeve-line plug valve for the most corrosive chemical services including HF Alkylation, requiring drop-tight shut-off.

Sizes: DN 15 to 450; NPS 1/2" to 20"
Press: PN 10, 16, 25 & 40; Class 150 & 300
Temp: -46°C to 288°C (50°F to 550°F)

DOUBLE-OFFSET Big Max BX2001

High-performance, all purpose valve designed for precise throttling control or on-off service with lighter weight piping systems

Sizes: DN 50 to 900; NPS 2" to 36"
Press: PN 10 to 40; Class: 150 & 300
Temp: -73°C to 288°C (-100°F to 550°F)

McCanna Valves

TOP ENTRY McCANNASEAL

High-performance top-entry, metal-seated or soft-seated wedge ball valve for use in PTA production. Ideal for remote operations with high-cycle frequency.

Sizes: DN 15 to 450; NPS 1/2" to 18"
Press: PN 20 to 60; Class: 150 to 1500
Temp: -196°C to 815°C (-320°F to 1500°F)

Medina Supply Inc. has been proudly supplying industries since opening its doors in 1975. Offering free delivery within our trading area and emergency after hour service 24/7, Medina Supply Inc. is committed to providing cost-competitive quality products. With a wide range of industrial equipment from leading manufacturers, Medina Supply Inc. can help ensure facilities are operating efficiently with minimal down time, offering solutions with the urgency required and service expected for your operations.
